Data  
Center  
Cooperative

ILLINOIS STATE LIBRARY

## Introduction

As the need for information at all levels of government and industry steadily increases, the scope and volume of information products that are developed also increases. The Illinois State Data Center Cooperative (ISDCC), in conjunction with the United States Bureau of the Census, is coordinating access to and use of these statistical resources for administration, planning, and decision making in the State of Illinois.

## Illinois State Data Center Cooperative

Data services are provided by the Illinois State Data Center Cooperative throughout Illinois through a five-member consortium. Each member provides a full range of data user services. Members are the Illinois Bureau of the Budget, Illinois State University, Northern Illinois University, Southern Illinois University-Edwardsville, and the University of Illinois at Chicago Circle.

The Illinois State Data Center Cooperative also provides services throughout Illinois with a network of regionally affiliated data centers designed to extend the access of printed resources to city and county levels. Regional affiliate data centers include regional planning commissions, health systems agencies, university libraries, and local public libraries. An address list is available upon request.

## Services

The Illinois State Data Center Cooperative staff make basic census information available and assist state and local government and community, business, and private organizations in interpreting census materials. A cost recovery charge is necessary for some services. Services include:

- Advising on the availability of data on particular subjects including population characteristics, housing, agriculture, mineral industries, construction industries, manufactures, transportation, retail trade, wholesale trade, selected service industries, and government.
- Providing and interpreting data for the 1970 as well as the 1980 census.
- Providing data definition and concepts.
- Providing consultation concerning the use of data for modeling and analytical applications.
- Providing population projections.

## Resources

The Illinois State Data Center Cooperative has census and special survey material available in printed publications and reports, computer tapes, microfiche, and maps.

## Training

The Illinois State Data Center Cooperative conducts seminars, workshops, and training courses to inform users of the products available and to provide instruction in their use.

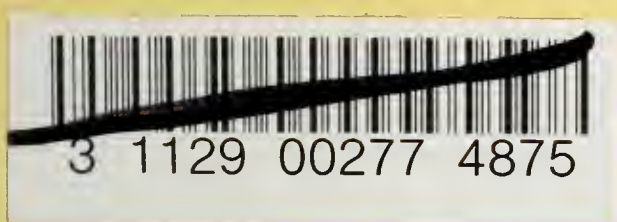

## Clientele

The Illinois State Data Center Cooperative provides these services for citizens, libraries, state and local governmental personnel, business people, community leaders, university educators, planners, and others throughout Illinois. If you would like more specific information about our services, please contact an affiliate or a core agency in your area.
